

## **Activity E: Vision Perception Station**

### **Materials:**

- *Large wall mirror or dressing mirror (Stores such as Walmart or Target carry lightweight, full-length models for hanging on doors that cost around \$20)*
- *Simple messages (i.e. Jesus loves you, You are amazing, Recess is fun) written in thick marker on 8 ½" x 10" paper or cardstock (6 – 12 should be enough, depending on group size)*
- *Yarn or string, cut in 2' lengths (one for each message)*
- *Hole punch*

*In advance, punch holes and thread yarn/string through messages so that they may be worn around the neck and hang at chest level.*

### **Purpose:**

*To experience what it is like to have dyslexia conditions that can play tricks on one's vision.*

### **Activity:**

- *Have each student stand in front of the mirror in turn.*
- *Place the message "board" over their head, so the sign is hanging at chest level.*
- *Have them try to read the message (it will be backwards of course).*

### **Discussion:**

1. *What was challenging about this activity?*
2. *What helped you with this activity?*
