

## **Disability Awareness Stations Follow Up Activity:** **Journal Prompts for Interacting Among People with Disabilities**

### *Helping Me Apply What I Learned at Disability Awareness Day*

Today you learned about some different disabilities, about the people with these disabilities and a little bit about what it might feel like to have the disability. Please take a few minutes to complete these statements about yourself and others with disabilities.

- Today I am thankful for:
- Let's turn it around: what is one way that a "disability" can be seen as an ability?
- What are three ways that someone with a disability and myself are the SAME?
  - 1.
  - 2.
  - 3.
- Put your learning into action: Next time I see someone with (*name a disability \_\_\_\_\_*), I will (*talk how with them, act how towards them, react towards them how*)...
- Since I experienced a little bit of what it is like to have a disability, now I can better understand (*name someone with a disability \_\_\_\_\_*) when they (*name something different that person does \_\_\_\_\_*) in my classroom. This is how I can positively change my actions and words towards him or her...
